The Global Institute for Disease Elimination (GLIDE) in collaboration with the New York University School of Global Public Health (NYU SGPH) offers an applied, multidisciplinary program to address disease elimination and eradication challenges across the globe.

The course will guide participants to develop and present viable disease elimination and eradication strategies for Neglected Tropical Diseases (NTDs) and infectious diseases at large.

COURSE DESCRIPTION

The course is jointly designed and delivered by the Global Institute for Disease Elimination (GLIDE) and the NYU School of Global Public Health. It develops competencies needed for disease elimination and eradication through analysis of the essential factors, including biological, economic, social, political, and leadership.

Please note that the course will be conducted in English

Principles of Elimination and Eradication

Health Systems Strengthening and Integration

Ethics of Elimination and Eradication

Community Engagement

TARGET AUDIENCE

- Health and development students including MPH and Public Health PhD students who are already engaged in, or are interested in, building skills and competencies for infectious disease elimination and eradication strategy development, with a focus on NTDs, malaria and polio.
